AML 2021 Fall Project Milestone

Due date: November 14 2021

The milestone submission should describe what you've accomplished so far, and briefly say what else you plan to do. The format should be the same as of the final project, with a maximum length of 3 pages (excluding references). The goal is to make sure that you are on track to finish the final project.

- Motivation: What problem are you tackling? Is this an application or a theoretical result?

- Method: What machine learning techniques are you planning to apply or improve upon and how?

- Preliminary experiments: Describe the experiments that you've run, the outcomes, and any error analysis that you've done. You should have tried at least one baseline.

- Future work: What else do you plan to do?

The goal of the milestone is make sure you're on the right track. As long as you follow the above guidelines, you should do well.

Please submit the milestone via Gradescope and make sure to submit as a team.
